Exercise 5

The Contoso Training and Events (CTE) company would now like to

Create a new extension that is adds two new fields to the instructor table and displays those fields on the instructor card

Create a codeunit that can accept the Registration Table as a source that will check for specific conditions of your choice on the registration

Create a library codeunit with a set of procedures for performing mathematical functions on sets of numbers.

Create a page that accepts user input and processes the data by using the library procedures
